The Georgian

St. George's College

1974-1975

FROM THE HEADMASTER'S STUDY

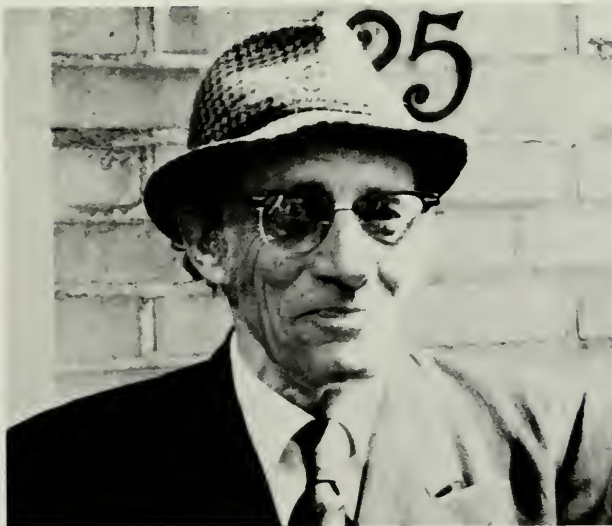

Another school year is drawing quickly to a close, and with it must come a time for reflection. Some of you have completed one year at St. George's; others ten or eleven years. Some of you have set high academic standards; others have excelled in games; while others have made a strong contribution in the choir. Many of you cannot be classified easily in any of these three categories. It is about this group that I wish to refer. Someone once said that the Lord must have admired the average student because He made so many of them. At last year's Closing and Prize Giving, Bishop Wilkinson spoke generously to the Prize Winners, but it was about those who did not win prizes that he addressed his warm thoughts. He stated that the world owed much to the average person. The early settlers in Canada were spoken of as being good sound stock — men and women of integrity and dedication. As I review the events of the last thirty weeks in my desk calendar, I note that such highlights as the United Appeal Campaign, the Guild activities, the St. George's College Association endeavours were all spear-headed by people who toiled unselfishly for the good of others. You have often heard me speak of the importance of developing a sound character both in and out of the classroom. Nobility of character is not a matter of intelligence, efficiency or money. It is a personal thing. It belongs to the individual and cannot be bought, inherited, borrowed, or sold. During the last eleven years much effort has been expended to develop in you sound habits of character. As you read through the pages of this volume you may appreciate the efforts of the boys who strove unselfishly for their school. My grateful thanks are here offered to the Georgian staff for another job well done.

Your friend & Headmaster
J. L. Wright

To H.P. Cawthorne, From the Graduating Class — 1975

Not for him, unyielding Yorkshireman,
The Pupil-Centred Curriculum
And "Progressive" Education.
The Open Classroom? — an abomination!
'The Pupil Decides,' 'The Unstructured Group' —
To such nonsense he would never stoop.
With all these concepts he could not consort —
He **still** hasn't read the Hall-Dennis Report!

It was the rule or the ruler, and, "I'll box your ears."
Thus he gave pupils over the years
Love clothed in discipline, and so they discerning
That hard work nurtures the value of learning,
Now from this growth at graduation
Flower affection and appreciation.

BITS & PIECES

SCIENCE FAIR

JUNIOR SCHOOL MR. TANSEY

The Junior School, I am happy to report, is alive and well and living in expectation of yet another good year. For the good years which are past we must give thanks to those three elements which constitute the whole: the students, whose individual characters combine to form our society; the parents, who through the Ladies Guild and the St. George's Association contribute so much support; and the staff, who strive — mostly in unison — with the others to make their college a valuable educational experience.

I feel that the college has provided such an experience over the previous eleven years, and it is my hope that we will continue to do so.

JUNIOR SCHOOL STAFF

Canoe Trip

From June 17 to 22, 1974, a canoe trip was held for 12 Grade 8 boys led by Mr Barlow, Mr Kiddell and Mr Fulford. We began at Port Severn, travelled through Gloucester Pool, Six Mile Lake, McRae's Lake and Georgian Bay (staying at Mr. Kerr's cottage).

The canoes and equipment were rented from Camp Shawanaga which also served as an initial and final base. The weather was cloudy for much of the trip which provided pleasant, cool paddling.

C. Crassweller	J. Jansen

D. Burry	J. Gibson
R. Linghorne	J. Lanskail
D. Hicks	M. Hamilton
D. Colnett	G. Flint

... in our passage from thence to the East-Indies, we were driven by a violent storm to the north-west of Van-Diemen's Land. By an observation, we found ourselves in the latitude of 30 degrees 2 minutes south. Twelve of our crew were dead by immoderate labour, and ill food; the rest were in a very weak condition ...

SCIENCE SCHOOLS

Following the success of the Grade 8 Science School in September 1973, it was decided this year to enlarge the programme to include all grades from Grade 4 to 8, spread out over the entire year. Upper Canada College's Norval property was selected as the site for the Schools. This area consists of 450 acres along the Credit River, with accommodation for 24 boys — perfect for taking one form at a time.

The programme of the Science Schools consists of daily classes (both indoor and outdoor) on the particular topics selected for that form, work time for individual projects done by each pupil, and study time for work on other academic subjects. One hour a day is spent on organized recreational activity, and two hours are given for free time.

It is hoped that this particular environment will augment the study of those science topics most conducive to this approach.
